TRAINING

Server & Cloud Security Management at BITM (SEIP Project Implemented by BASIS).

KEY PROJECTS EXPERIENCE

MDM (Mobile Device Management) – Mobionizer
Platform: Web & Android Application.
Role: Senior QA & Security Testing.

- Designed and executed comprehensive test plans and test cases.
- Performed API, Load, Stress, Regression, and Cross-Platform testing.
- Identified, reported & resolution critical bugs before production release.
- Conducted security testing & validation aligned with OWASP Top 10.

eSign and Digital Signature Certificate
Platform: Web & Android Application.
Role: Senior QA & Security Testing.

- Designed and executed comprehensive test plans and test cases.
- Performed API, Load, Stress, Regression, and Cross-Platform testing.
- Identified, reported & resolution critical bugs before production release.
- Conducted security testing & validation aligned with OWASP Top 10.

eKYC
Platform: Web & Android Application.
Role: Senior QA & Security Testing.

- Designed and executed comprehensive test plans and test cases.
- Performed API, Load, Stress, Regression, and Cross-Platform testing.
- Identified, reported & resolution critical bugs before production release.
- Conducted security testing & validation aligned with OWASP Top 10.

GIB & SBI Online Banking Solution
Platform: Web & Android Application.
Role: Senior QA & Security Testing.

- Designed and executed comprehensive test plans and test cases.
- Performed API, Load, Stress, Regression, and Cross-Platform testing.
- Identified, reported & resolution critical bugs before production release.
- Validated authentication, transaction workflows, and access controls.
- Conducted vulnerability validation and secure release verification.
- Ensured compliance with security and quality standards.
- Conducted security testing & validation aligned with OWASP Top 10.

MIST EMS
Platform: Website
Role: Senior QA & Security Testing.

- Designed and executed comprehensive test plans and test cases.
- Performed API, Load, Stress, Regression, and Cross-Platform testing.
- Identified, reported & resolution critical bugs before production release.
- Conducted security testing & validation aligned with OWASP Top 10.
