## LANGUAGES

Bengali, English, Hindi and Malay.

## TRAINING

Server & Cloud Security Management at BITM (SEIP Project Implemented by BASIS).

## KEY PROJECTS EXPERIENCE

**MDM (Mobile Device Management) – Mobionizer**
**Platform:** Web & Android Application.
**Role:** Senior QA & Security Testing.

- Designed and executed comprehensive test plans and test cases.
- Performed API, Load, Stress, Regression, and Cross-Platform testing.
- Identified, reported & resolution critical bugs before production release.
- Conducted security testing & validation aligned with OWASP Top 10.

**eSign and Digital Signature Certificate**
**Platform:** Web & Android Application.
**Role:** Senior QA & Security Testing.

- Designed and executed comprehensive test plans and test cases.
- Performed API, Load, Stress, Regression, and Cross-Platform testing.
- Identified, reported & resolution critical bugs before production release.
- Conducted security testing & validation aligned with OWASP Top 10.

**eKYC**
**Platform:** Web & Android Application.
**Role:** Senior QA & Security Testing.

- Designed and executed comprehensive test plans and test cases.
- Performed API, Load, Stress, Regression, and Cross-Platform testing.
- Identified, reported & resolution critical bugs before production release.
- Conducted security testing & validation aligned with OWASP Top 10.

**GIB & SBI Online Banking Solution**
**Platform:** Web & Android Application.
**Role:** Senior QA & Security Testing.

- Designed and executed comprehensive test plans and test cases.
- Performed API, Load, Stress, Regression, and Cross-Platform testing.
- Identified, reported & resolution critical bugs before production release.
- Validated authentication, transaction workflows, and access controls.
- Conducted vulnerability validation and secure release verification.
- Ensured compliance with security and quality standards.
- Conducted security testing & validation aligned with OWASP Top 10.

**MIST EMS**
**Platform:** Website
**Role:** Senior QA & Security Testing.

- Designed and executed comprehensive test plans and test cases.
- Performed API, Load, Stress, Regression, and Cross-Platform testing.
- Identified, reported & resolution critical bugs before production release.
- Conducted security testing & validation aligned with OWASP Top 10.
